As Home – As Home is an all-in-one real estate and hospitality platform that combines property listings, vacation home rentals, and hotel reservations into a single seamless digital ecosystem. The platform is designed to simplify the entire booking and property management experience for both travelers and property owners through a modern, scalable, and user-friendly interface.

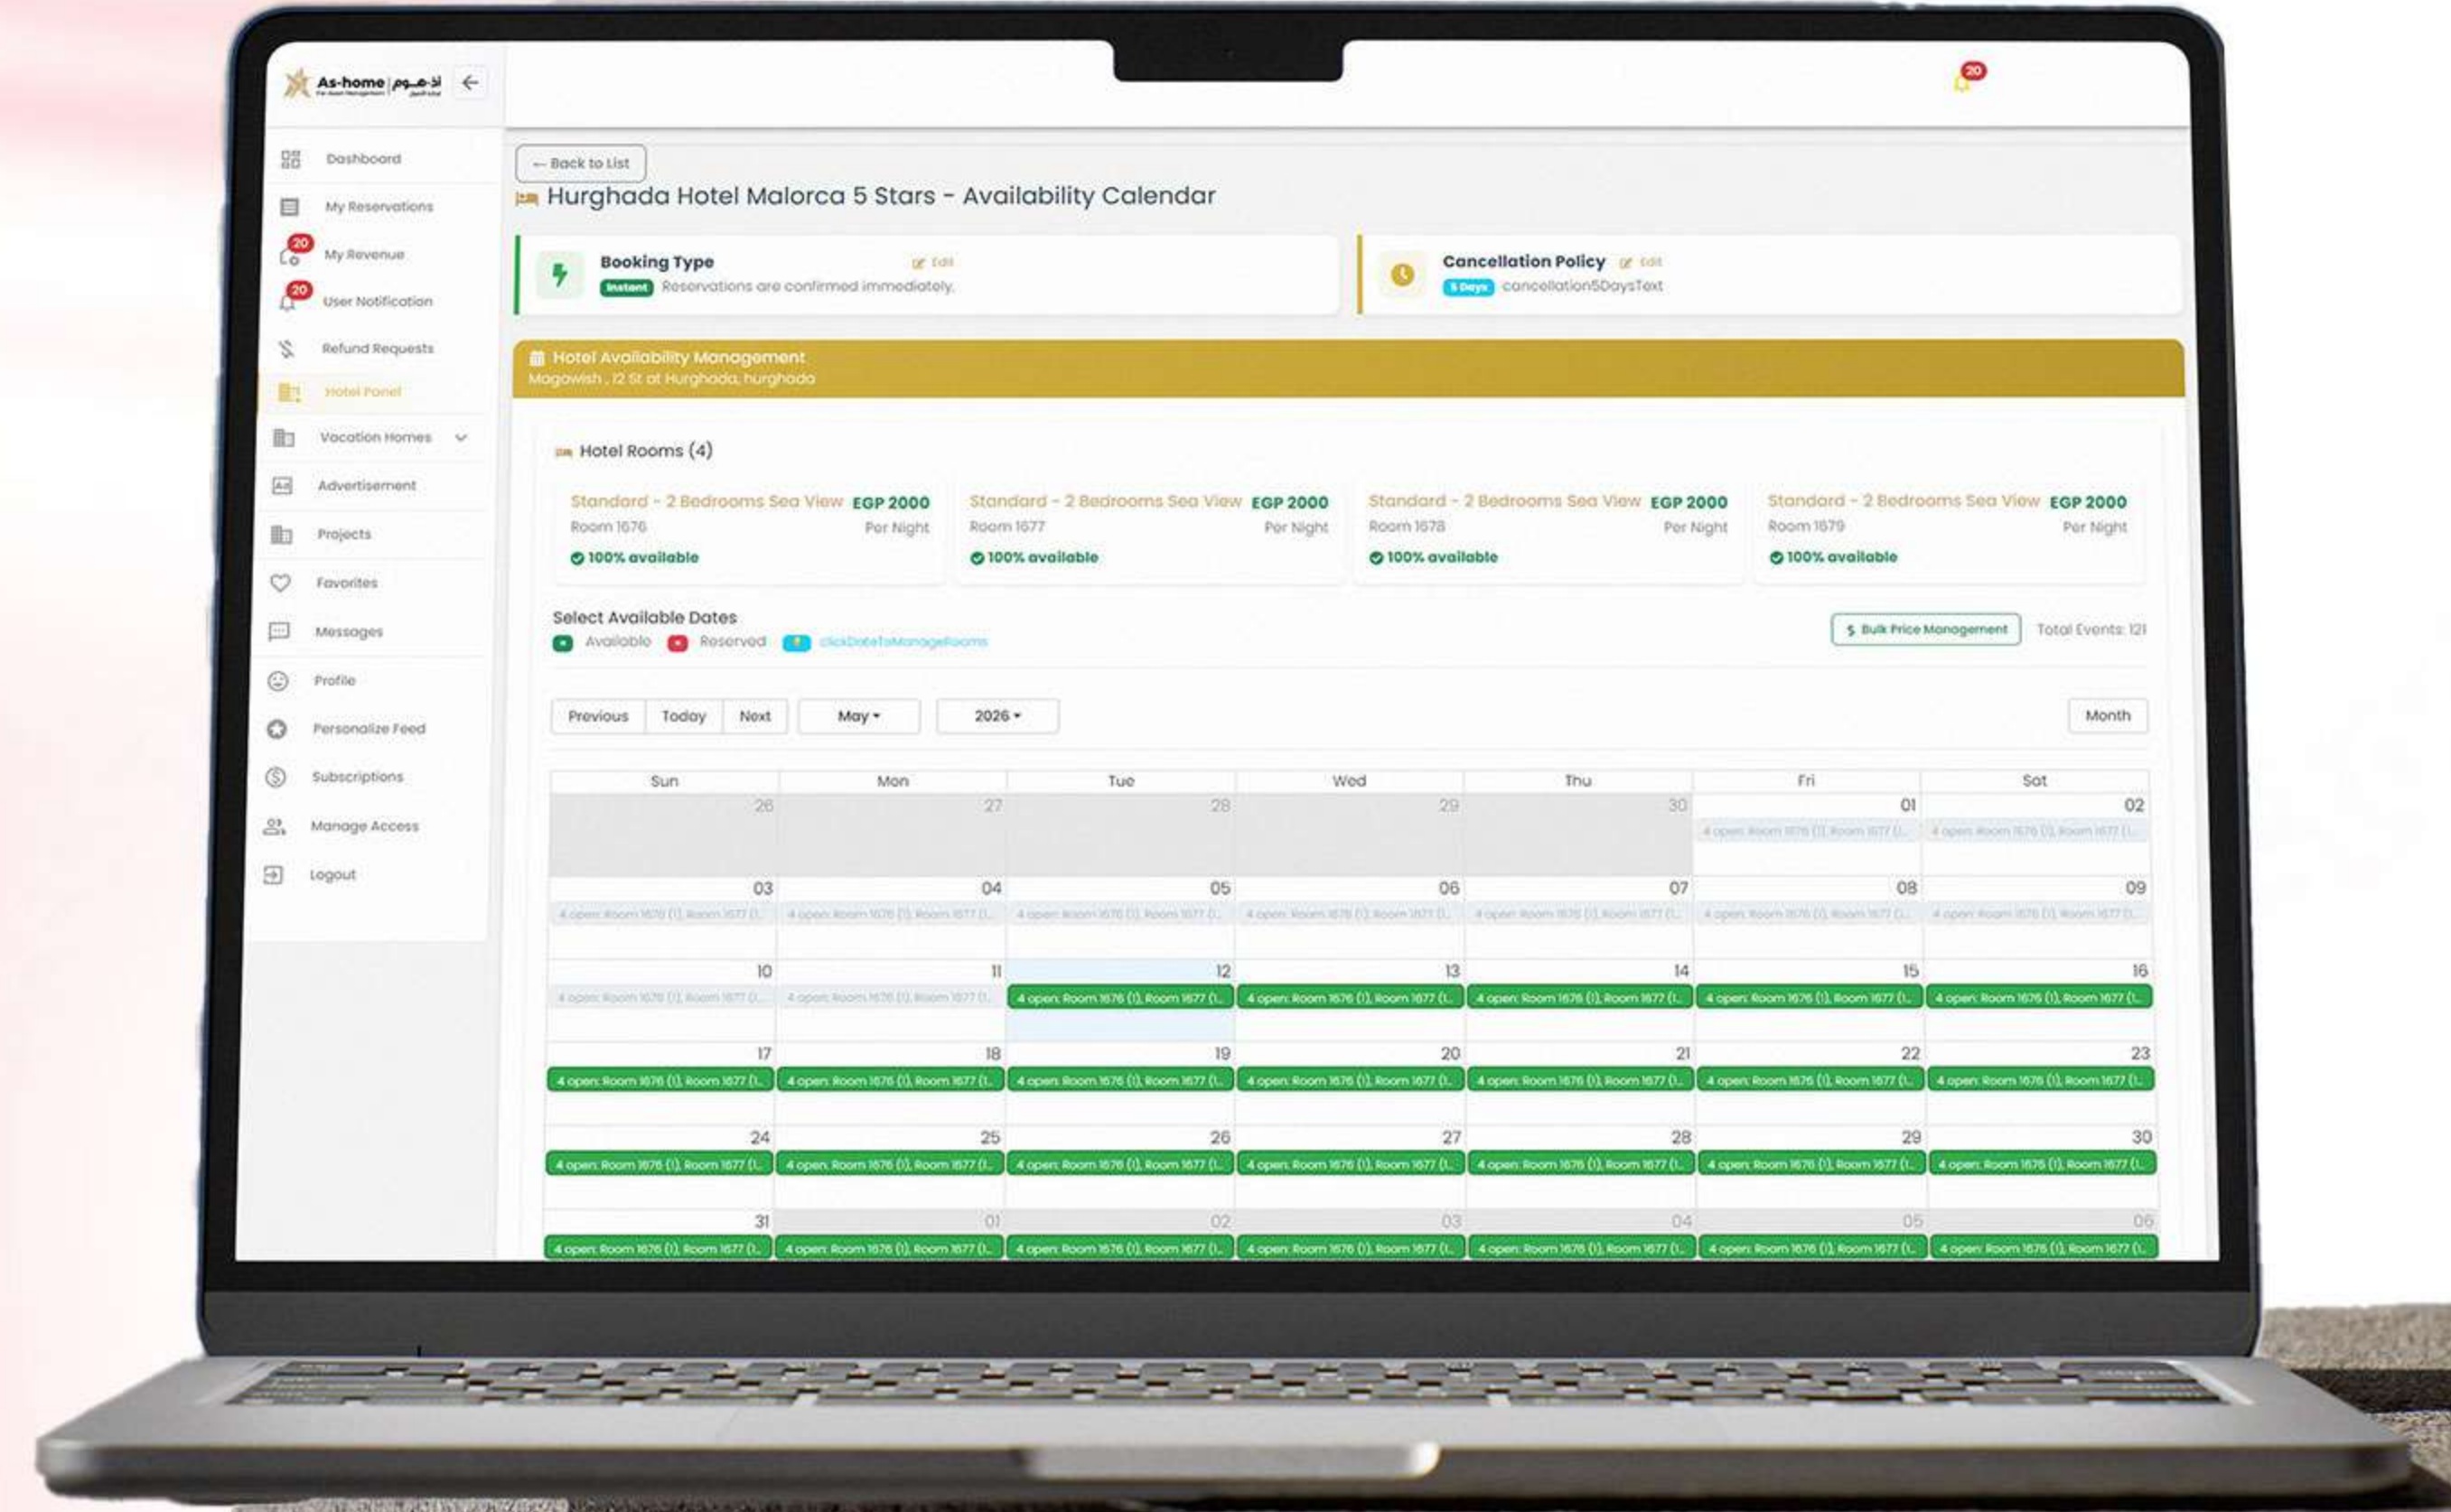

The platform includes a fully integrated mobile application with two operational modes: Guest Mode and Host Mode. In Guest Mode, users can explore properties, book vacation homes or hotels, manage reservations, communicate with hosts, and access a smooth travel experience directly from the app. In Host Mode, property owners can manage listings, control reservations, monitor booking activity, update property availability, handle customer requests, and track property performance efficiently through a dedicated dashboard.

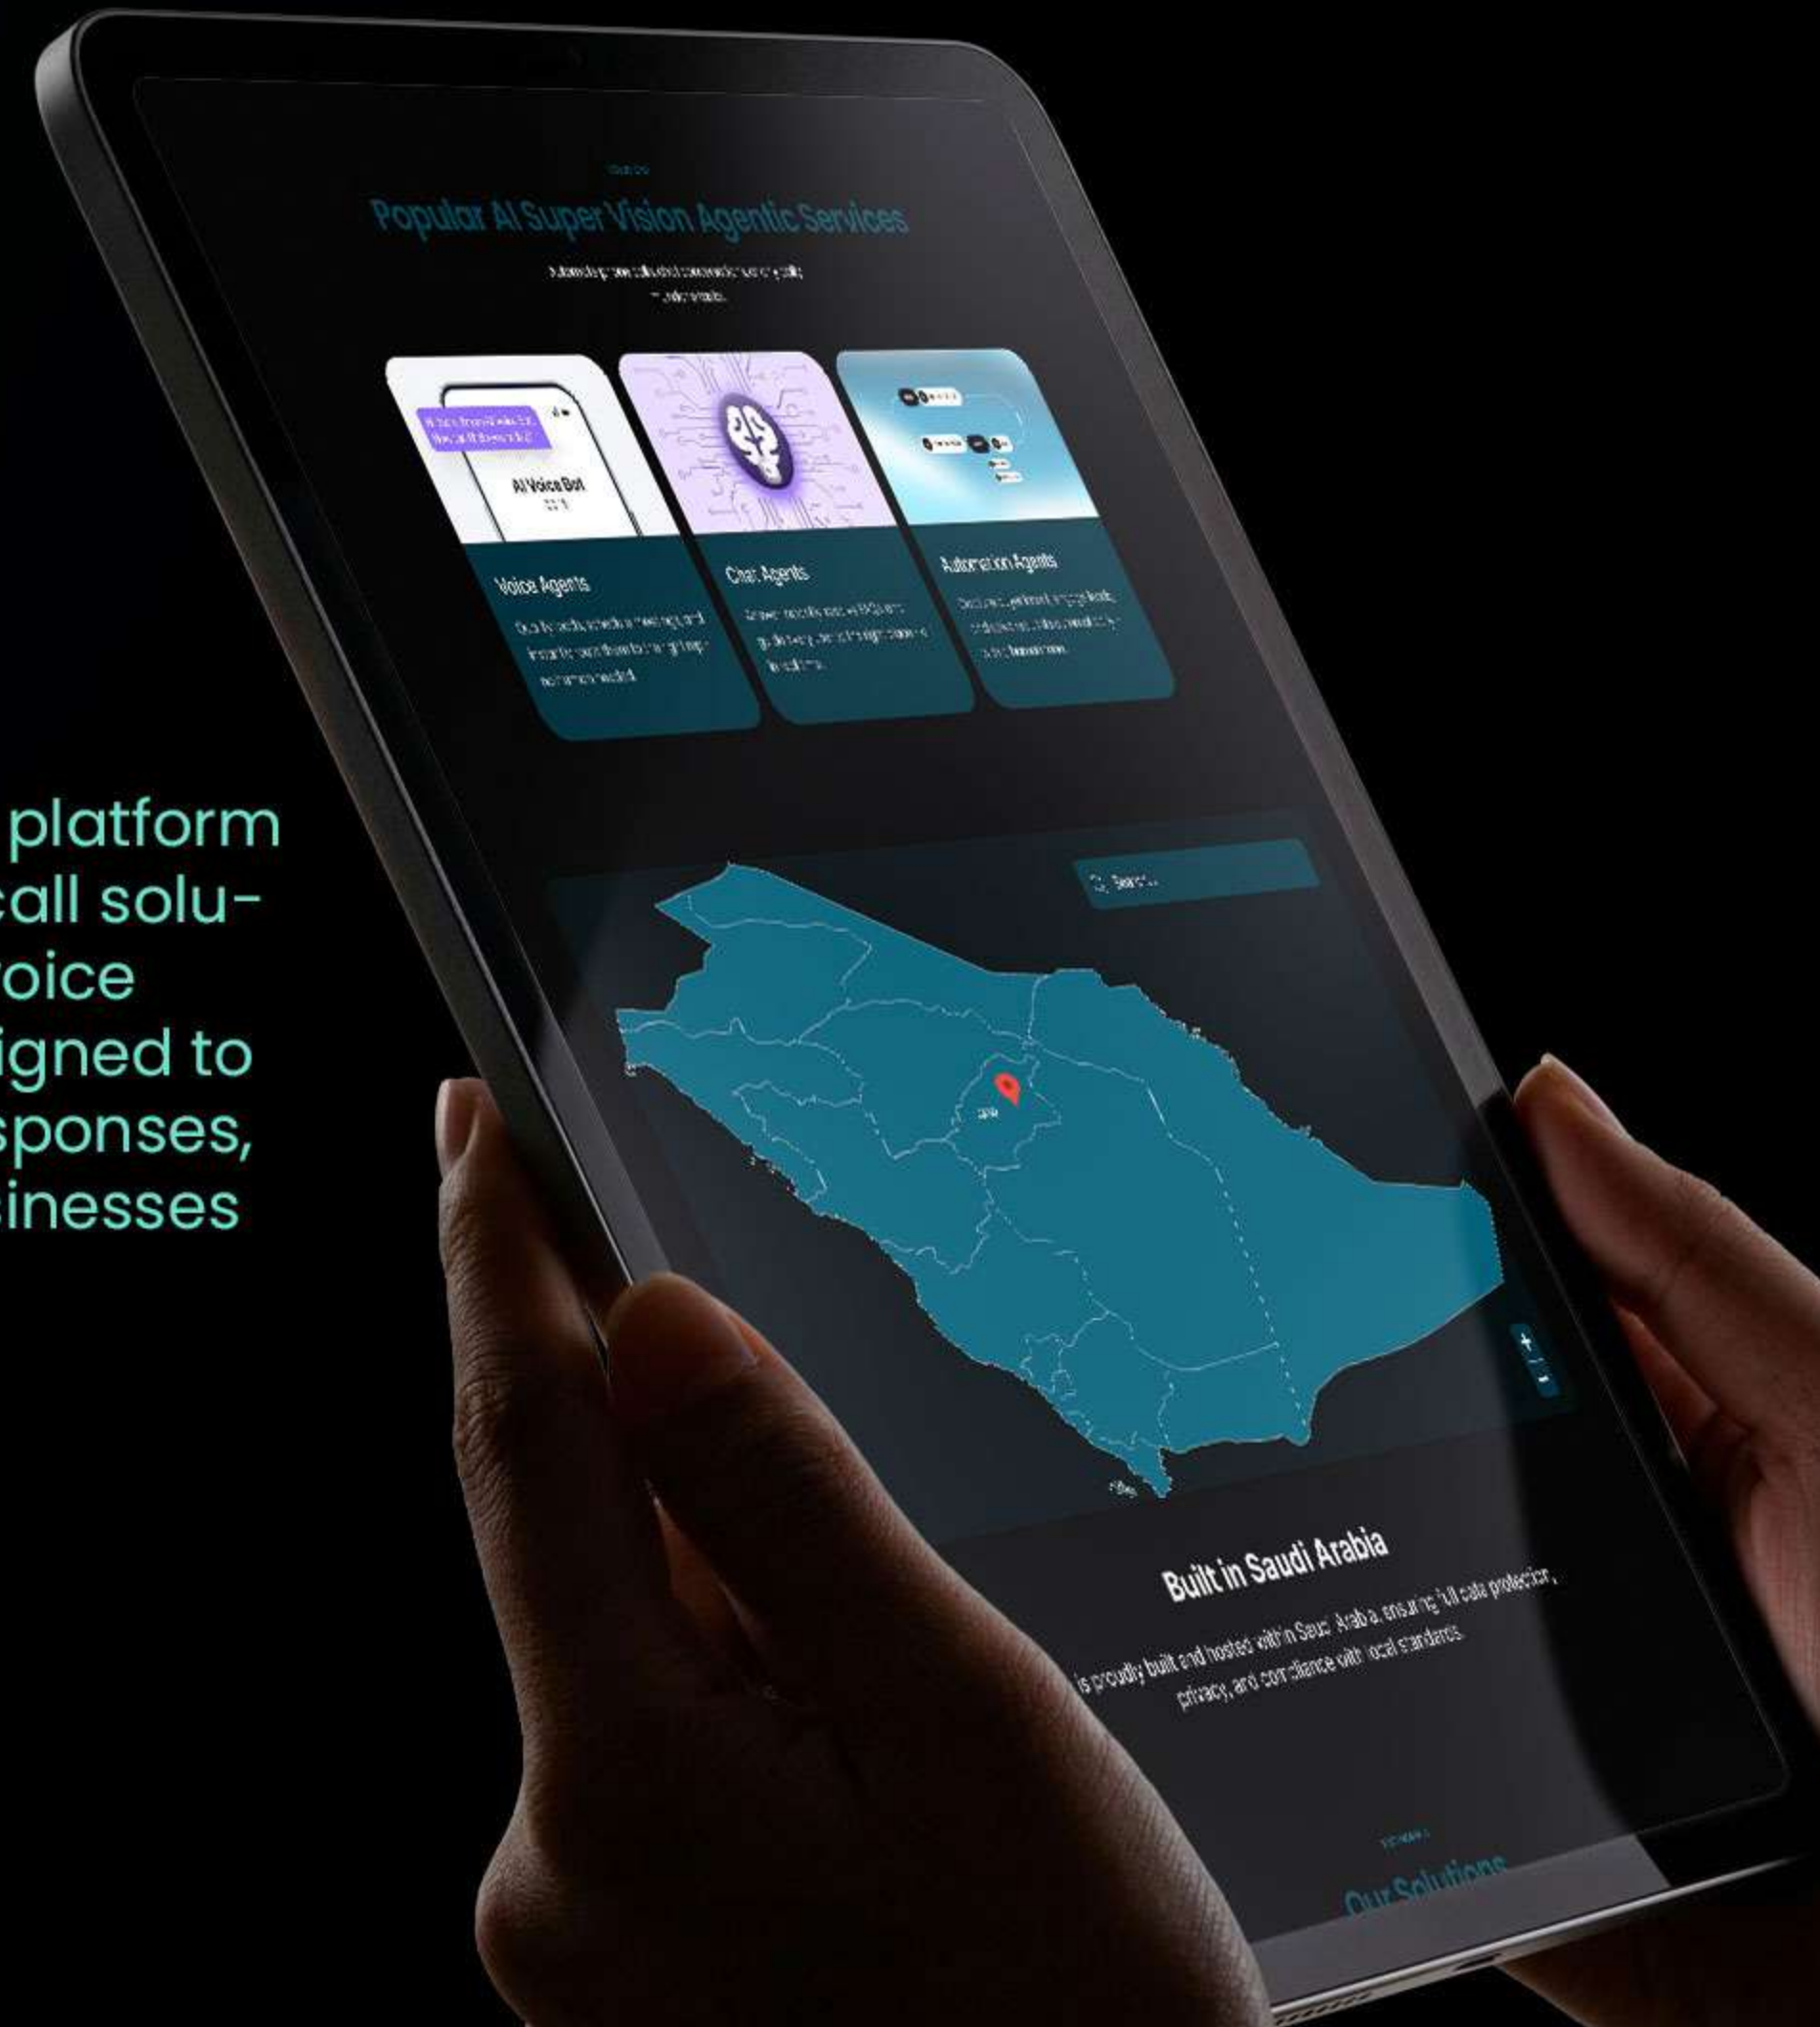

As Home is an all-in-one real estate and hospitality platform that combines property listings, vacation home rentals, and hotel reservations into a single seamless experience. The platform simplifies property discovery, booking management, and user communication while offering a modern interface optimized for both property owners and travelers. Its goal is to create a centralized ecosystem for real estate and hospitality services with a user-friendly digital experience.

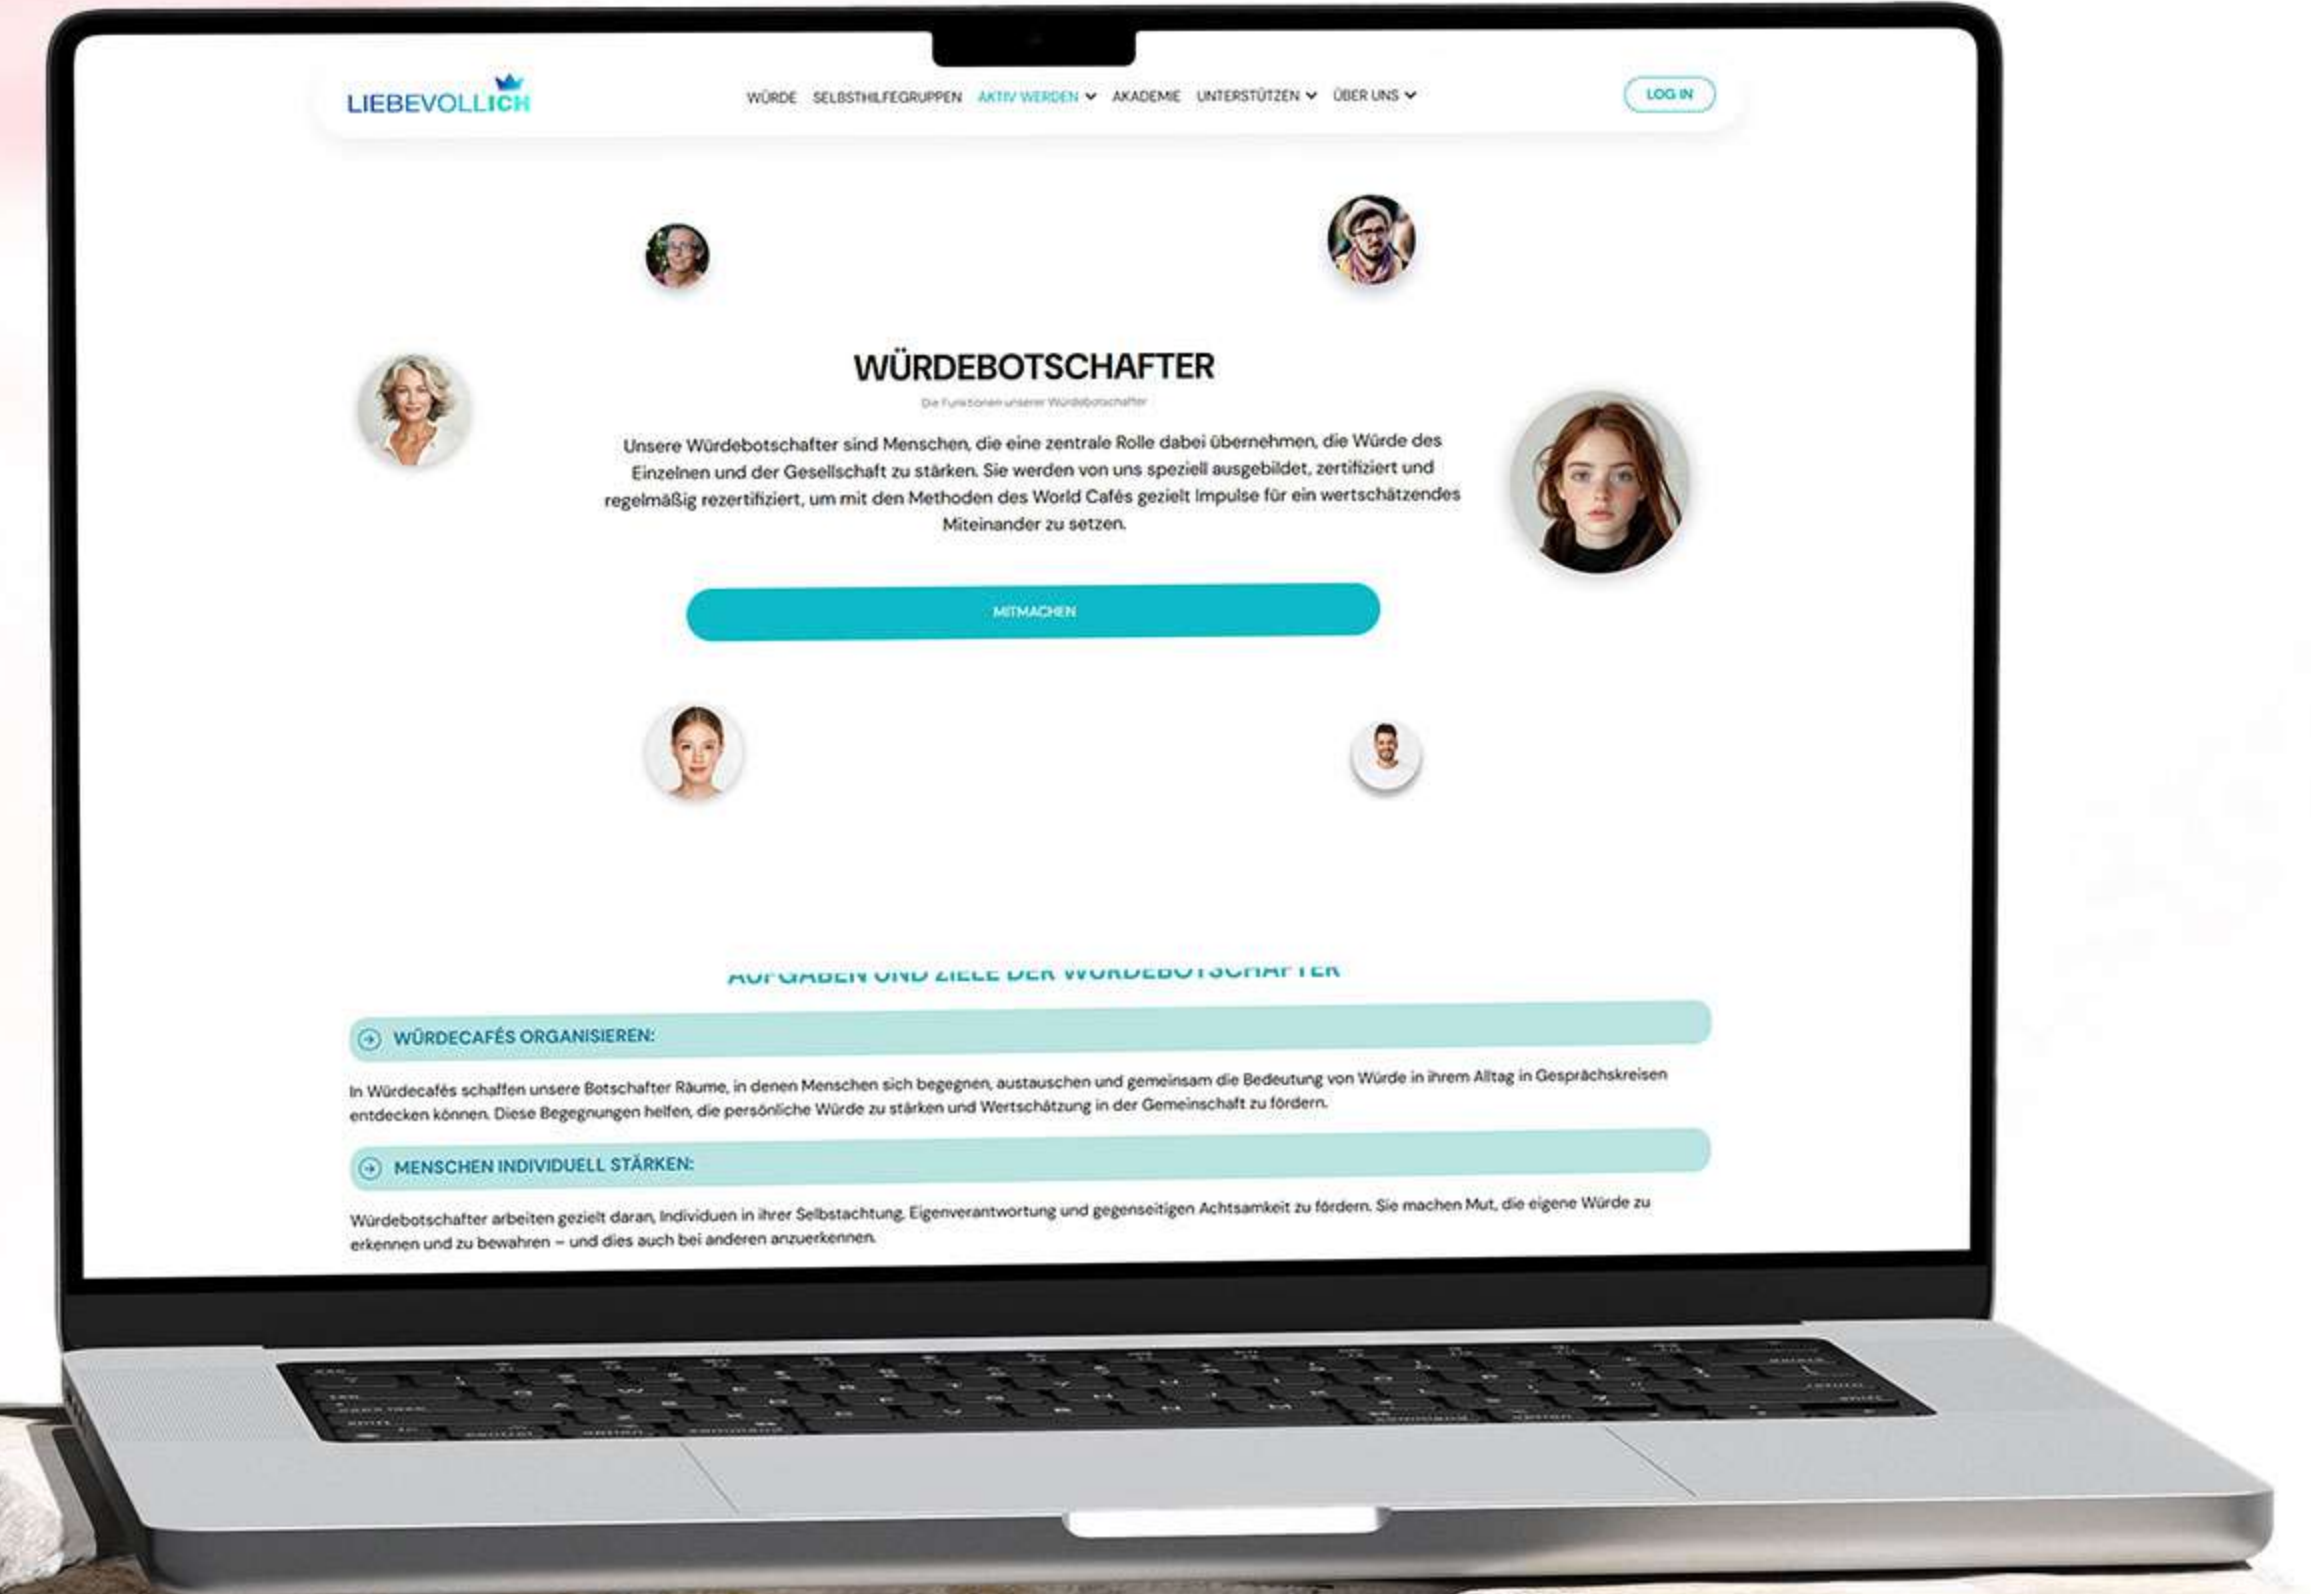

Araq is a Saudi-based AI voice agent service platform developed to provide intelligent automated call solutions through SIP integration and advanced voice communication systems. The platform is designed to handle customer interactions, automated responses, and voice-based workflows efficiently for businesses operating in Saudi Arabia.

Liebevollch is a Germany-based community and social impact initiative focused on education, cultural connection, and community support. The project aims to create meaningful engagement through digital platforms, awareness programs, and community-driven activities. Its online presence reflects a warm and inclusive identity while supporting communication, accessibility, and social development initiatives.
